

Over 35 years of Quality Hunting

2023

K I O W A

HUNTING SERVICES
RATON, NEW MEXICO

WHY HUNT WITH KIOWA HUNTING SERVICE IN NEW MEXICO?

- New Mexico is known for its big game populations and its quality of animals.
- Kiowa offers both private land and public land hunts. Private land hunts allow you to purchase across the counter licenses and the public land hunt licenses are by application and draw.
- Kiowa offers several levels of public land guided hunts to meet your needs and budget, from our fully guided and accommodated hunts to a limited 2 day guided hunt, after which you may continue to hunt, with no accommodations or meals. These include the use of our outfitter number to apply for the draw, which can significantly increase your odds of drawing. **WE DO NOT CHARGE FOR THE USE OF THE OUTFITTER NUMBER. IT COSTS US NOTHING FOR YOU TO USE IT, SO WHY PAY OTHER OUTFITTERS MONEY FOR SOMETHING THAT YOU CAN GET FOR FREE?!** Please see the following pages for a full description of the hunts offered.
- Kiowa Hunting Service is licensed by every National Forest (6) located in New Mexico, every Bureau of Land Management District (5) in the State, The State Land Office and White Sands Missile Range. We can provide you a public land hunt for any species and for any public location in New Mexico. We are one of the very few outfitters that can give you multiple options to apply for hunts, throughout the State of New Mexico. Most outfitters are licensed for one or two National Forests or one or two BLM districts and cannot offer you multiple options.
- Kiowa has been in business for 35 years and maintains a professional relationship with landowners, federal land agencies and state agencies. Kiowa is licensed by the State of New Mexico and by the public land use agencies upon whose property we hunt.

WHY HUNT WITH KIOWA HUNTING SERVICE IN COLORADO?

- Kiowa leases one of the premier elk hunting ranches in Colorado. The ranch is located within GMU 83, one of the few totally private land game units in the state.
- Kiowa's ranch provides you the opportunity to hunt for and to take 300 B&C class bulls. This ranch consistently produces this quality of bull.
- Kiowa provides hunts on this ranch for archery and rifle.
- Colorado offers across the counter licenses for archery hunts. The rifle hunts are by draw requiring one preference point to draw for sure and we often draw with 0 points. The landowner has license vouchers and will sell them to you to allow for you to buy a license. The vouchers are strictly between you and the landowner.
- Kiowa offers you the opportunity to have a quality experience with use of the lodge, guides, catch and release fishing, and the opportunity to take that "big" bull that you have always thought about.
- Please look over the information contained in our brochure. Contact us for all your hunt and draw needs, or if you have any questions.

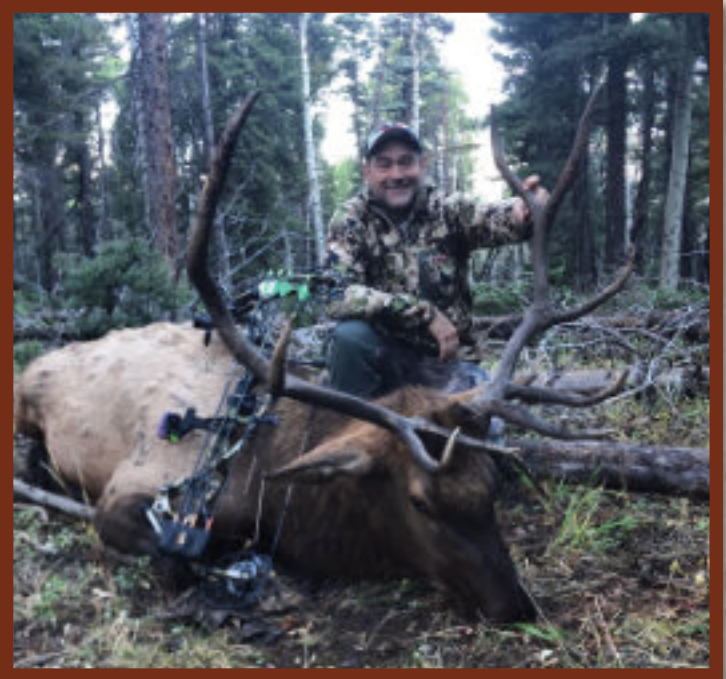

Have a safe and fun 2023 hunting season!

NEW MEXICO - GUIDED ONLY HUNTS WITH NO SERVICES

This hunt will allow you to apply for a PUBLIC LAND elk or deer hunt, using the outfitter number to increase your odds of drawing a license. A guide will be furnished for the first two days of your hunt, which is mandatory by Game and Fish regulations. You may also book a guided only hunt for one of the following time frames: five days to nine days depending on the weapon type of your hunt.

You may apply in any unit that you would like, unlike other outfitters that only operate in a hand full of units and do not offer you opportunities to apply in different areas. We DO NOT operate in wilderness areas, i.e. units 45 and

16B/22 or any other unit that is comprised of a majority of wilderness area. Kiowa also separates itself from other outfitters, because we do not charge anything for the use of our outfitter number, to increase your draw odds. Kiowa Hunting Service is licensed by ALL of the national forests in the state and by all of the Bureau of Land Management Districts in the state. We are also licensed by the State Land office.

One guide will be provided for the first two days of your hunt, mandatory by state law, when you use the outfitter number for a tag. Kiowa will furnish one guide for all hunters that are on the successful application. If you want an extra guide for the two days, there will be an additional charge of \$300.00 per hunter in the party. If you decide that you want a guide only hunt, for five days, seven days or nine days we will guide only on a 1x1 or 2x1 basis.

Additional guides or additional days, must be determined at the time of the booking and may not be modified unless additional personnel are available.

PARTIALLY GUIDED AND ACCOMMODATED HUNTS

PUBLIC LAND RIFLE, BOW, AND MUZZLELOADER

These hunts are only offered in **Game Management Units 10, 12, 51 and 52** for all weapons types (rifle, muzzleloader and bow). These hunts are designed for those hunters who are looking for a quality hunt, feel confident about hunting elk on their own and want a guide for part of their hunt, and do not want the hassle of having to bring and set up a camp.

These are the answers to the most frequently asked questions about the partially guided hunts:

1. We have one camp and do not provide individual camps for groups.
2. We do not pack people into areas.

3. I do not know how many people are in camp as it is based on the draw.
4. In these camps, Kiowa provides the cook, meals, snacks water and soft drinks and a person knowledgeable of the area to send you to where we feel you will find elk. We provide tents, cots, pads, shower area, lights and heat, rest rooms or porta-potties.
5. The hunter is responsible for the license, personal gear, bedroll, weapon and transportation to and from camp and during your hunt without the guide.
6. This hunt has a higher success rate than the two-day guided only hunts and the reason is simple. On the two-day guided only we are there two days and leave, no assistance, no additional knowledge, nothing else is

furnished. In the partially guided and accommodated you can receive up to date knowledge of where elk are seen or heard about, additional areas to hunt, and assistance with retrieval. While you are hunting, the staff is out scouting for you. This additional information will allow you to move to areas that have recently been seen with elk, consequently the potential for a higher success rate. Unless you are intimately knowledgeable of the area you are hunting and know where to look after two days, you are on your own.

Unit Descriptions:

The units that we offer this service in can be described as follows: **Unit 51** and **Unit 52** are located in North Central New Mexico. **Unit 52** is approximately 300,000 acres in size and **Unit 51** is approximately 380,000 acres. Both of these units are in a roadless/ wilderness area that prohibits off road vehicles and off road traffic of any type. This is a public draw unit and it usually offers a very high opportunity to draw a license with the use of the outfitter number.

Units 10 and 12

These areas consist of National Forest, Bureau of Land Management, New Mexico State trust and private land holding. The area is located south and west of Grants, New Mexico and is on the north end of the Gila range. I consider **Unit 10** a sleeper unit. While it has smaller numbers, it has a good population of quality elk that has the potential to produce for you the bull of a lifetime. Due to the makeup of the unit, Native American reservations, National monuments and private land holdings these areas provide a bull the opportunity to gain age and consequently size. We have taken bulls off of this unit that are greater than 300 B&C and occasionally one better than 350 B&C.

Unit 12 is predominately private land and checkerboard areas. There are good areas of Bureau of Land Management

properties located on East side of the hunt and on the south side of the hunt unit. This unit is known for big bulls, but the area is checkerboarded and you need to make sure that you will know where you are at during your hunts. The drawing odds for this unit are difficult.

GUIDED ELK HUNTS - FULLY ACCOMMODATED

CARSON NATIONAL FOREST- UNIT 51 & UNIT 52

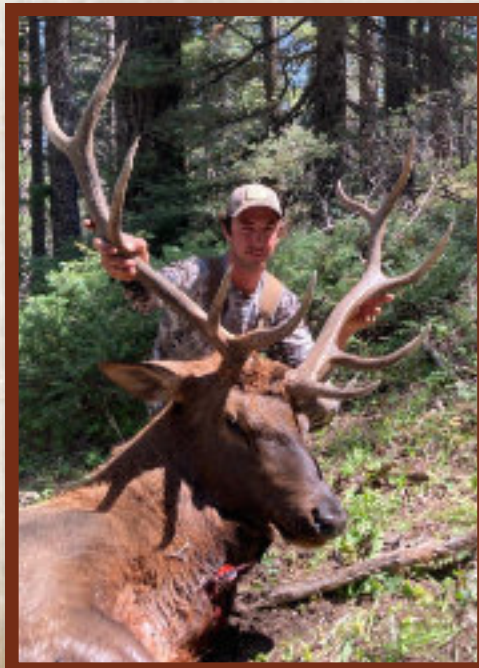

Unit 51 and 52 are our main units on the Carson, but we offer hunting in all units of the Carson National Forest, including units 2, 50, 53, and the Valle Vidal in unit 55A. We offer hunts utilizing all weapon types, rifle, muzzleloader, and archery. The units on the Carson are all very large running from 100,000 acres to almost 400,000 acres. The vegetation runs from timberline to sagebrush flats, so a hunter can find an area that suits his capabilities. Most of these units have Motor Vehicle restrictions and there is no off road or minimal road traffic allowed. For a description of units 51 and 52 see the previous page.

These units offer the hunter easy access, an excellent elk population, and limited hunting pressure. This is a public draw unit and it usually offers a good opportunity to draw a license with the use of the outfitter number.

- **The cost of hunt includes:** the use of the Outfitter Number for drawing a license, the appropriate number of guides, accommodations, meals, courtesy transportation during the hunt, retrieval of game and capping for trophy preparation of the animal.

- **The hunter is responsible for:** applying for the license, with our help, their personal items including bedroll and weapon, and transportation to and from camp.

GUIDED ELK HUNTS - FULLY ACCOMMODATED

LINCOLN NATIONAL FOREST - UNIT 34, 36, AND 37

We offer bow, muzzleloader and rifle hunts in these units. These units are known for big bulls and excellent numbers of elk. The guides for these units are very knowledgeable of the hunt area, are excellent hunters, and have a history of getting clients on big bulls. These are excellent units, and because of this it can be very difficult to draw a tag. These units are extremely popular and are in high demand by the sportsmen. These units have some of the best bull to cow ratios of any unit in the state. The odds of you drawing this tag far surpasses those of the Gila Units. Game Management Unit 36 is easiest to draw, and has the highest bull to cow ratio in the state at 71:100 according to Game and Fish. This is your opportunity to have a chance to draw a tag and have a guided hunt to go with it, for the cost of the landowner tag. You should make one of these hunts a minimum of one of your three choices on your application. We only offer fully guided and accommodated hunts OR 2 day guided with no accommodations or meals in these units.

- **The cost of the hunt includes:** accommodations, meals, courtesy transportation during the hunt, assistance in the retrieval of the harvested animal, and caping for trophy preparation of the animal.
- **The hunter is responsible for:** applying for the license, with our help, and their personal gear including bedroll and weapon.

★ GILA NATIONAL FOREST ★

These are THE bulls that you hear about. In the past the Kiowa Team has taken bulls up to 383 and often take bulls in the 340 and 350 class. Everyone wants to hunt the Gila and some do. Great hunts, but understand that if you apply for these tags use one choice and not three. The odds of you drawing a Gila tag are around 5% or less. All Gila units are not equal and there are some units and some hunts that are easier to draw than other units in the Gila. The easiest way to determine the easier to draw units is to give us a call and we can discuss the different units. Great hunt if you draw but if you want to hunt elk, look at some additional options. Great hunt, great guides and great bulls. We only offer fully guided and accommodated hunts OR 2-day guided with no accommodations or meals in these units.

- **The cost of the hunt includes:** Accommodations, meals, courtesy transportation during the hunt, retrieval of the harvested animal and caping for trophy preparation of the animal.
- **The hunter is responsible for:** applying for the license, with our help, and their personal gear including bedroll and weapon.

CIBOLA NATIONAL FOREST UNITS 10 AND 12

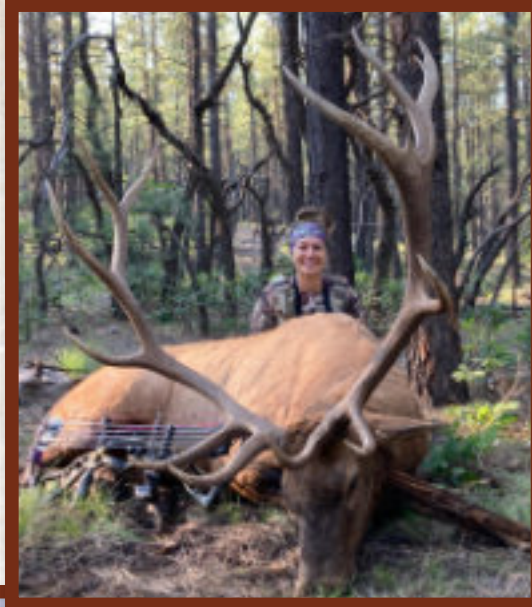

These units are known for big bulls and a good number of elk. Although the number of elk in these units are not as high as in other units, the size of the units, the national monuments, closed areas, and private land holdings within the hunt unit, allow for bulls to gain age and consequently size. The guides for these units are very knowledgeable of the hunt area, are great hunters, and have a history of getting clients on bulls.

This area is lower in elevation than other units, the terrain is easier than some units and there is a network of roads for access throughout the unit. The camp is located on private property, and offers easy access to most of the unit. The camp is located on the south end of unit 10 and we will use this camp to access the unit 12 hunts. This unit has normal dates for archery hunts, but only one muzzleloader and only one rifle hunt, which is another reason that the elk have a chance to get bigger in this unit. We offer all three types of hunts on the Cibola, two-day guided with no accommodations, two-day guided with accommodations and meals and fully guided for the hunt with accommodations and meals.

- **The cost of the hunt includes:**

accommodations, meals, courtesy transportation during the hunt, retrieval of the harvested animal, and capping for trophy preparation of the animal.

- **The hunter is responsible for:** applying for the license, with our help, arriving in camp, or meet at motel (cost is hunter's responsibility), personal gear, weapon, license and stamps, and care for the animal after it arrives in camp.

PRIVATE LAND (GUARANTEED LICENSES)

BULL ELK RIFLE

These are Guaranteed License hunts that occur on private ranches in New Mexico. All of the following ranches have the potential to produce 300 B&C class bulls for the hunters.

Hunts begin in early September with archery and in early October with rifle and muzzleloader, to take advantage of the rut and the bugling of the bulls. You will be hunting where we know there are elk. We have a high percentage of shot opportunity for a hunter to harvest bull elk. These hunts are not very physical. Each private land ranch differs by terrain, elk population, the number of hunters on the ranch per

hunt, accommodations, and other variables. Call us and we'll discuss the options with you and pair you with a ranch that is suitable for what kind of hunt you would like.

The cost of the hunt includes: private landowner authorization, meals, guide, accommodations on some hunts, courtesy transportation during the hunt, and caping for trophy preparation of the animal.

The hunter is responsible for: their personal gear, weapon, transportation to the prearranged meeting area, meat processing, taxidermy, motel costs and NM elk license.

★ PRIVATE LAND ELK - UNIT 7 ★

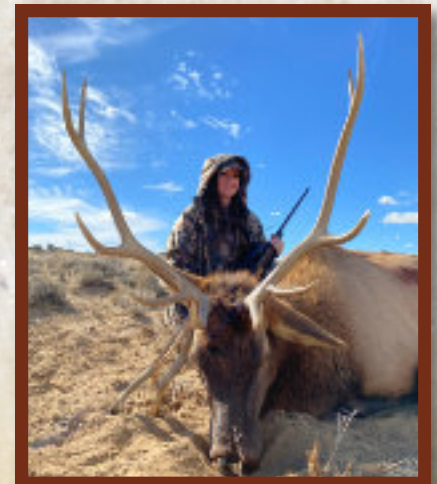

This ranch is situated north of Grants, New Mexico, in GMU 7, in the western center of the state, just north of I-40, west of Albuquerque. The ranch is located about a 45 minute drive out of Grants, New Mexico and at an elevation of approximately 7,000 feet.

We have hunted this ranch for the last seven years and have maintained a 90%+ success rate for both archery and rifle. This ranch has been highly successful, not extremely physical and challenging. The ranch is hunted very lightly per hunt, thus the high success rate of the hunt. These are five- and six-point bulls and occasionally we will find a bull that will exceed 300 B&C. This is not a "get out and hike 10 miles a day hunt" but the hunter must be able to cover some distance to get to the elk. This is not a truck hunt and vehicles are used minimally during this hunt. This ranch is 12,000 acres in size.

We operate the hunt out of Grants, New Mexico. Accommodations will be in a motel in Grants, at hunter's expense, and the meals will be in restaurants in Grants at Kiowa's expense. The typical day will be to travel from Grants to the Ranch to begin the hunt, once on the ranch,

we will be there all day. There is a bunkhouse on the ranch where we have lunch and take a break during the day hunt. There are no modern facilities at this bunkhouse. After your harvest your animal will be skinned and quartered up. There is a meat processor in Grants that can have your meat cut up for you quickly. The head will be caped, and you can take your trophy with you or we will relay the trophy to a taxidermist that we utilize.

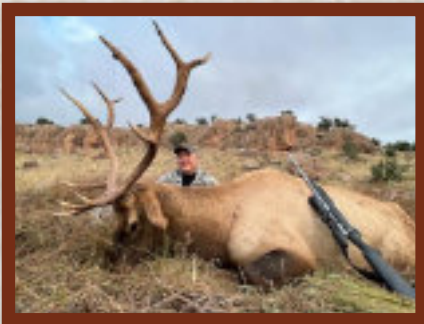

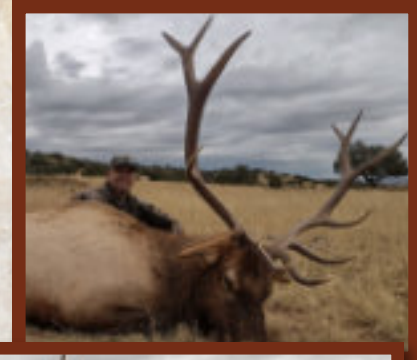

Private Land Elk

PRIVATE LAND ELK UNIT 10

The ranch is situated west of Grants, New Mexico, west of Albuquerque. The elevation is approximately 6,800 feet. We have hunted this ranch for the last five years and have maintained a 90%+ success rate for rifle bull elk hunts. This ranch has been highly successful, not extremely physical or challenging. The ranch is hunted very lightly per hunt, thus the high success rate of the hunt. There are some exceptional bulls that come on this ranch. In the past we have taken bulls up to 370 B&C. The hunts on this ranch are very limited and vacancies are rare. Our policy on our private land hunts is to not book in advance several years. We offer the hunters that hunted with us this year, the first right to return. Only if they do not rebook do we open up our bookings for the ranch. Though this hunt is not overly physical, the hunter must be able to cover some distance to get to the elk.

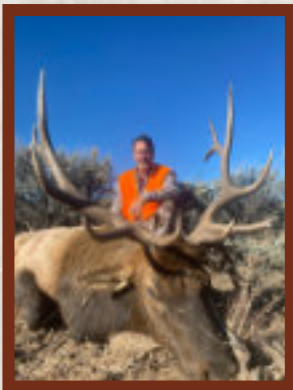

the right to limit the number of non-hunters participating in the hunt, to maintain the quality of the hunt. For details on what Kiowa furnishes and what the hunter furnishes please see the top of page 8.

We operate the hunt out of Grants, New Mexico. Accommodations will be in a motel in Grants, at hunter's expense, and the meals will be in restaurants in Grants at Kiowa's expense. Kiowa Hunting reserves

COLORADO PRIVATE LAND ELK HUNT

This hunt occurs in Southeastern Colorado in Game Management Unit 83. This is a great hunt with the potential of harvesting a once in a lifetime bull. This is truly a trophy class ranch where you can take that 300 plus B&C bull. This hunt, though easier than some, is still an elk hunt. You are hunting at 7,500 to 10,000 feet in elevation, the lodge is located at 9,500 feet. The better physical condition you are in, increases your odds for success. Though easier than some elk hunts, it is still an elk hunt and that translates into getting out and hunting. This is not ride around in a vehicle and trying to find an elk. You start the morning out walking and you end up the evening walking. Come prepared. Covering multiple miles on any outing is a normal situation. It is a morning and evening hunt and not a hike the hills all day type of hunt.

In a normal weather year, this area will hold a tremendous number of bulls. The area hunted is 11,000 plus acres and runs from sagebrush flats with wetlands, to timberline and above. We will hunt this ranch during the archery seasons, and the second, third, and fourth rifle hunts.

All rifle hunts are by draw with the application window for Colorado closing April 5th, 2023. In 2022 we had a 100% draw rate for the rifle hunts. If you fail to draw then you may purchase a license voucher from the rancher that will enable you to buy a license across the counter.

Cost of hunt includes: guide, courtesy transportation during the hunt, private land trespass, accommodations in the ranch lodge, meals, trophy preparation of the animal, and put and take trout fishing. Airport pickup can be arranged if flying into Alamosa, Colorado.

Hunter is responsible for: hunting license, personal gear, weapon, and arrival at camp.

Application Deadline for rifle hunts: April 5, 2023

Even though we are busy most of the fall, we occasionally find time to go hunting with other outfitters and in other states. We're often asked who we recommend and we do not recommend anyone we have not hunted with. We know numerous outfitters but do not go in their camps and do not know details about their operations, so we cannot truthfully recommend them. So, as a service to our customers here are two outfitters that "we hunt with," have been in their camps, and know how they operate. We have no reservations about recommending them if you want to

hunt in Colorado or Arizona.

The three different states have three different draw procedures: New Mexico has no preference or bonus points and is a strict lottery, you are in the draw. Colorado has a preference point system and unless you have enough points to draw, you are not in the draw. Arizona has a bonus point system where you are given bonus points for the years that you have applied and you may draw, even with no points. This is a simplistic view of the draws.

COLORADO

New Mexico's license lottery is a draw system. There are always some hunters that, unfortunately, do not draw. After the draw we receive numerous inquiries of where hunters can go, such as across the counter hunts, public hunts, or private land voucher hunts. Colorado is a "preference point" state, so if you have enough preference points there are some truly great hunts that you can draw, and some hunts are good with no points. When I or my family hunt in Colorado we only hunt with one outfitter and that is "Twisted Tine Outfitters of Colorado". Chad Kribbs is the go-to guy for Colorado elk and deer hunts. You can look him up at:

www.twistedtineoutfittersco.com

or call him at **970-250-1052**.

Twisted Tine (TTO) operates on over 1,000,000 acres of private and public land in Colorado GMUs 40, 41, 421, 42, 30.31, 521, 60, 61, and 62. If you have enough preference points and we are talking about 26 to 27 points for nonresidents, Unit 40 is the go-to unit for big bulls. I hunted it and it has more big bulls around than almost anywhere I have ever been. This unit is also great for rutting mule deer hunts. TTO does across the counter hunts in 30, 31, 41, 421, 42, 60, and 62 but concentrate in 421, 41, and 42.

TTO can put you on a deer hunt whether you have 0 or 10 preference points. They have low impact hunts based on several of their ranches and have high desert hunts in units 40, 60, 61, and 62. If you have enough points there is also the rutting fourth season hunt in unit 40.

TTO also offer high fence elk hunting near Hotchkiss, CO. They offer hunts for all budgets from cows to 500+ bull elk. Great accommodations, airport pickup at Grand Junction, CO, and transport you to the ranch for your hunt. These three-day hunts will be very successful, and they will get you the animal that you would like.

Who Do We Hunt With?

ARIZONA

Arizona is a bonus points system, which means that you may draw a hunt with 0 bonus points. The odds are against you, but it does happen every year. Our go-to man in Arizona is Grant Hottman with Grant's Guide Service. Visit www.grantsguideservice.com or call Grant at 602-399-0337. Grant started out guiding for us and still

does guide for us when he is not guiding his own hunters in Arizona. Grant is knowledgeable about the Arizona Draw system, the units that are good, and where you can go with across the counter tags or a limited number of bonus points and how to do it. Grant guides for elk, mule deer, bighorn sheep and all the big game species in Arizona. Grant is a very good hunter and takes some tremendous animals. The difficulty in Arizona is drawing the tag, but if you do you will be into great hunts.

OUTFITTER RAMBLINGS

The New Mexico Department of Game and Fish has come out with new rules for the upcoming four years for all big game species. Things have changed and you can determine whether the changes are good or bad... it's your call.

I will give you a synopsis of changes by species and may or may not add my two cents.

1. Take the scopes off of the muzzleloaders

- The Department has made it "iron sights" only on all muzzleloaders for all big game species beginning in this upcoming year.

Comment: This should increase your odds of drawing a muzzleloader elk tag, assuming you can shoot an open sighted rifle.

2. Changes to Barbary Sheep

- They are increasing the number of licenses by 20%+ due to increased populations.
- Increase in the number of tags and the number of hunts in the two main hunt areas that are drawn for.
- Hunts went from 14 day hunts to seven day hunts and seven hunts per hunt area and a major increase in tags on the later hunts, after the new year.

Comment: This is the year to draw a Barbary Sheep tag.

3. Changes to Oryx

- Increase off-range licenses by 18%.
- Change the "Iraq/Afghanistan Veteran" hunts to allow "any veteran" to be eligible.
- Youth licenses become "once-in-a-youth". They would qualify to apply for on range once in a lifetime hunt when they reach 18.

Comment: Odds are going to improve on all of the hunts but especially off-range hunts.

4. Changes to Ibex

- Muzzleloader hunts become 7 day hunts.

Comment: Good move, need to save the herd.

5. Changes to Deer

- Lots of "tweaks." Some units are getting cut and some are getting increases. They are rearranging some hunts but there are no major concerns.

Comment: New Mexico has some good public land deer hunting. It's a good time to apply.

6. Changes to Elk

- About the same as deer. Some movement of numbers, a few new hunts due to population increases, and some changes in hunt dates but nothing overly exciting.

Comment: The herds keep growing and so do hunter numbers.

7. Changes to Antelope

- Shift in hunt structure is occurring. This past year the hunts were all in August. Next year there will be one hunt in late August, one in late September and one in October.

- There will be some shift in numbers but it is minor numbers

Comment: Good move on dates, need to hunt after the rut.

8. Changes to Bighorn

- A new hunt in the Jemez population, probably in 2024.

- Split the Hatchet Mountains into the Little Hatchets and the Big Hatchets.

- Create two hunt windows in the Peloncillos and Ladrones.

- Create a third hunt in the Rio Grande Gorge.

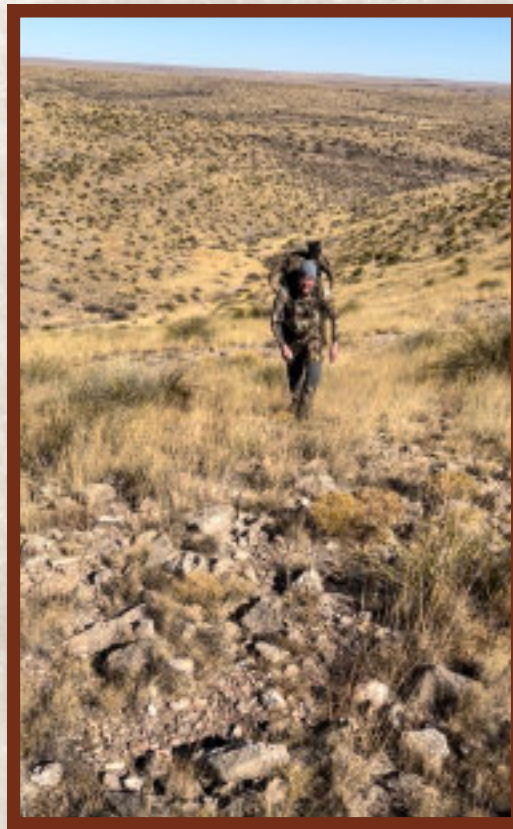

Comment: There is a push to eliminate Nonresident Bighorn hunting by several "hunting groups". Get ready for a disagreement.

Q: How do I improve my odds of drawing a tag?

A: I was once hunting with a gentlemen on an Oryx hunt and we were discussing Big Game Banquets like RMEF and Ducks unlimited. The gentlemen turns to me and says, "Do you know how to improve your odds of winning rifles at the banquets?" My response was eloquently, "How?" His response was, "Buy a lot of raffle tickets!" And there you have it. This translated to my comments below and this is what I do and would do.

It is time to get into the draw multiple times and in multiple states. I apply in three states: New Mexico, Arizona and Colorado. The Arizona deadline to apply is before

the deadlines for New Mexico and Colorado. The Arizona results are usually out before the New Mexico and Colorado draw. The way to do it, in my opinion, is to put in for Arizona and then back up with applications in New Mexico and Colorado. If you draw an Arizona license you can leave your applications in for New Mexico and Colorado if you want to have two or three hunts, or cancel them and get a refund. If you do not draw Arizona, then you are in the draw for both New Mexico and Colorado. If you do not draw in New Mexico then you are still in for Colorado. If you do draw New Mexico, then cancel your application in Colorado... or go for two hunts. Improve your odds, diversify your applications, apply in more than one state, and increase your chance for a hunt. Last option is to go to Colorado on an across the counter license and go hunting.

Antelope - Public Land

PUBLIC LAND ANTELOPE HUNTS

We are again offering public land rifle antelope hunts. Our antelope hunts will be "guided only" and for the entire three days of the rifle seasons and for the first three days of your archery hunt. Of course we will use the outfitter number to aid you in drawing. There are many good antelope units in New Mexico. The license, when you draw it, will be valid for any public land, with a legal access, throughout the unit. Due to the permit allocation system you will need to have a

minimum of 7 available licenses, for one person, with the outfitter number to draw. The more applicants on the application, the more available licenses for that unit need to be available.

GAME MANAGEMENT UNIT 38 & VAUGHN, NEW MEXICO

This is our historic antelope ranch. We have been the exclusive outfitter on this ranch since 1996 and have taken countless antelope from the ranch and it continues to produce big animals. The ranch is large and offers hunts on over 78,000 acres. We are the only outfitter that hunts on this ranch. This is just an excellent antelope ranch with numerous return clients each year.

This ranch holds in excess of 350 antelope with approximately 100 bucks as of the last survey conducted. The management plan for this ranch is to limit harvesting to 20% of the buck population. Our current plan is to harvest closer to 15% of the buck population.

We are only offering one hunt this year and we are reducing the number of hunters that we are taking by 50%. The drought is beginning to take a toll on the fawn crop survival rate. We have collectively decided, the ranch owners and us, that to preserve the quality of the species, we need to help them out and that is by not over-harvesting. So with that said, we reduced the number of hunts that we are doing by 50% and have elected to hunt the later hunt over the early hunt. The reasoning for this is that the rut occurs in September and we would rather harvest the bucks after the breeding season than before the season.

Mule Deer - Private Land Guaranteed Licenses

RUT & PRE-RUT MULE DEER HUNT - VAUGHN, NM

This hunt is located out of Vaughn, New Mexico. This ranch is 78,000 acres in size and has a mixture of antelope and deer habitat. We have hunted and managed this ranch since 1991.

The ranch has continually produced deer into the 180 and 190 class, with the possibility of that type of deer being there for your hunt.

Kiowa Hunting Service has enrolled the ranch in the New Mexico Department of Game and Fish's Deer Enhancement Program. Because of this program Kiowa has received a special set of permits that can be used outside of the normal deer hunting season dates set by the state. We receive one set of permits that we can use from September 19 to December 14, 2023, and another set that can be used from December 15, 2023 to January 31, 2024.

MULE DEER HUNT UNIT 10

The ranch lays in GMU 10 in the central part of New Mexico. The private ranch consists of 7,000 acres of private land. The plan is to take only two hunters on the ranch for the season. This ranch produces quality mule deer and deer in excess of 180 B&C have been killed on it. This hunt will be during the regular seasons and will consist of a lot of glassing to locate the quality deer that you would want. The licenses for this hunt are across the counter and there is no draw for the tags.

OLD MEXICO TROPHY MULE DEER HUNT

These hunts are for the giants of the desert that come from Sonora, Mexico. They occur between Guaymas and Hermosillo in Sonora, Mexico. Hunts are six days in length and are conducted by walking, vehicle, spot and stalk, and by hunting water holes. The hunts are highly successful. These mule deer are what the average American mule deer hunter can only dream of.

Everything is included in this package from the time you arrive in Mexico until you depart. You are responsible for arriving in Hermosillo, Mexico, personal gear and weapon, and gratuities.

This hunt can also be modified to allow for two mule deer or a mule deer and a Coues Whitetail. It can also be combined with a vacation for your significant other, lounging on the beaches of San Carlos and enjoy the resort town. It was voted the Best Ocean View in the World out of 500, and is #1 of the Top 10 list by National Geographic. Mexico is a safe destination in the interior. Do not worry about visiting. In the years that we have been doing these hunts we have never had anything remotely close to any incident. This is the hunt and vacation that you really will want to come back to each year.

Mule Deer - Public Land

New Mexico

NEW MEXICO PUBLIC LAND MULE DEER HUNTS

New Mexico has many excellent mule deer hunts on public land, but they are all by draw and the application must be submitted by March 22nd, 2023. Our guides have their personal areas that they like to hunt and we will discuss them later in this section. We are licensed by the New Mexico National Forests, Bureau of Land Management Districts, and the New Mexico State Land office, so we can hunt in any unit that you desire. We are one of the few outfitters in the state that can do this for you. Most outfitters may be licensed in one or two areas and they confine you to applying in those areas, if they are utilized. We will assist you with the application, offer hunt suggestions for you based on what you are wanting in a hunt, and allow you to use the outfitter number, for free, to improve your odds of drawing. We offer you three types of hunts on public land:

1. a two day guided hunt with

no accommodations or meals,

2. a fully guided tent camp with accommodations and meals, or

3. If we are near a town we will hunt out of town from motels. The cost of the motel is your responsibility, but we will furnish all meals for your hunt.

We will hunt all three weapon types during the public land deer hunts, and for both Mule Deer and Coues Deer.

The type of hunt you are looking for and which species you desire will dictate as to what we would suggest you apply for. We will not be hunting during the September Archery deer hunts unless you also have an archery elk hunt for the same season. The reasoning is that we may not have the staff available for the

deer hunts due to commitments on the elk hunts. There are several great units to apply for where they take some exceptional deer. There are other units that are just fun deer hunts. Remember that you have three choices and can mix and match units, weapon types, and time frames. Call us and we can work on a game plan for you.

NEW MEXICO UNITS 24 OR 27

This will be a public land hunt in either GMU 24 or 27 for the Gray Ghost or the Coues Deer. These are prime Coues areas in New Mexico. We are licensed by the appropriate National Forests and Bureau of Land Management Districts and are one of the few that are licensed in Unit 27. If you apply for the Coues deer hunts MAKE SURE that you apply for the hunts listed as FAWTD. DO NOT APPLY FOR FAMD. FAWTD stands for Fork Antlered Whitetail Deer, this is the Coues hunt. FAMD stands for Fork Antlered Mule Deer.

We offer two types of archery hunts for Coues:

1: Guided only, either two-day or five-day hunts or **2:** fully guided and accommodated hunts. If we are near a town, only in unit 24, we will hunt out of town from motels. The cost of the motel is your responsibility, but we will furnish all meals for your hunt. Remember these hunts are in January and very likely will have bad weather, that is why we guide only or may operate out of a motel.

★ OLD MEXICO COUES DEER ★

The White-tailed Coues Deer is a sub species of White-tailed Deer. The majesty of the Sierra Madre mountains in the east part of Sonora makes the perfect range for this exclusive White-tailed Coues Deer. For the past three years in Mexico we have consistently killed deer that are 100" B&C and up with a combined average of 115" B&C.

Five full day hunt package includes: 1x1 guide, accommodations, all meals, and ground transportation during the hunt. The cost of the hunt also includes airport pickup at Guaymas or

- Lunch day meal and all snacks and drinks during the hunt.
- Hunter is responsible for their own accommodations, meals, and cost of trophy preparation if desired.
- Guide for either a 1x1 or 2x1 hunt.

ORYX PUBLIC LAND ON-RANGE HUNTS

Kiowa Hunting Service offers hunts for free ranging Oryx (Gemsbok) on White Sands Missile Range (WSMR) and also on McGregor Range. We are one of the few licensed outfitters operating on both of the ranges and have been there since outfitters were legally allowed on WSMR. The WSMR and the McGregor Range hunts are public land hunts and the licenses are allocated by drawing. There are numerous hunts to apply for on the WSMR hunts beginning in September of 2023 and running through February of 2024.

WSMR hunts are three day hunts and McGregor Range hunts are two day hunts. WSMR hunts are once in a lifetime while McGregor Range hunts are not. If you have already hunted on WSMR then you can trophy hunt again on McGregor

Range. The other options for someone that has held a WSMR permit is to apply for the broken

horn hunt on WSMR or put in for an off range hunt as your last choice.

Notable changes for 2023 are that the Department has done the following:

1: increase the number of permits issued per hunt, **2:** changed the "Iraq/Afghanistan veteran" hunts to "Any Veteran" to be eligible, **3:** youth licenses become "once in-a-youth" and are not once in-a-lifetime hunts anymore.

We offer two hunt packages for the WSMR hunts:

All Inclusive Package:

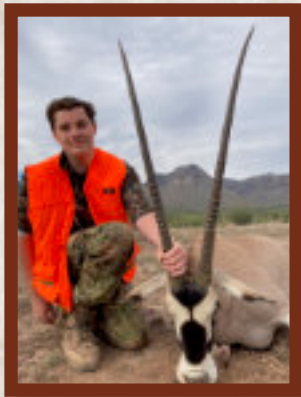

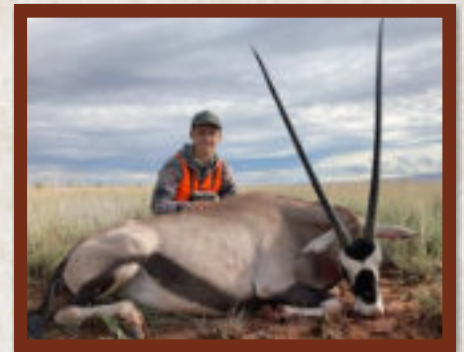

- Transportation to the hunt area from motel and transportation during the hunt utilizing our vehicles.
- Motel accommodations, 1x1 hunt single occupancy, 2x1 hunt double occupancy.
- All meals and snacks from the night before the hunt to the end of the hunt.
- Guide for either a 1x1 or 2x1 hunt.
- Hunter is responsible for their own accommodations, meals, and cost of trophy preparation if desired.

ORYX PUBLIC LAND OFF RANGE HUNTS

We will be conducting off range hunts during the year. These hunts are open anywhere on public land for an entire month. We will guide you for five days. We will be doing only the No-Frills package on this hunt. For details about this package see above on the On-range hunts.

At the time of the hunt we will decide on what hunt area we would like to concentrate on. On most hunts you will have additional personnel scouting and trying to locate an Oryx for you. The population off range does not compare with on range hunts, but the odds of drawing are good.

The success rate on the off range hunts was 60% last year, so the Department has increased the number of licenses issued by 18% for this year. If you want to take an Oryx, then I would apply for one of these hunts as a second or a third choice. The difference between the "on-range" hunts and "off-range" are fairly simple. The on-range hunts you can be picky and still have a good opportunity to take a really nice Oryx (86% success rate), off-range you cannot be picky and if the Oryx is anything close to what you want you better be after it. The average days hunted off range was also 5.5 days per hunters. This hunt and the McGregor Range hunt open up your options.

DESERT BIGHORN SHEEP - NEW MEXICO

New Mexico's desert bighorn sheep are doing well. We can conduct hunts on any Bighorn Sheep area that you would like to apply for.

We have the staff that is familiar with the hunt areas and can provide you with an excellent and successful hunt. These hunts begin in October and run through March of the following year. The dates depend on the unit drawn.

Cost of the hunt will include: Outfitter number and assistance in applying for the license in the draw, daytime meals and snacks, courtesy transportation during the hunt, guide and spotter service, trophy

preparation of your animal and retrieval of the animal.

The hunter is responsible for: Transportation to the nearest agreed upon town, motel, morning and evening meals, personal gear, weapon, etc. and the cost of the license.

DESERT BIGHORN SHEEP

New Mexico 7-Day Hunt
\$6,900 + tax
Season dates depend on Unit and range from August through March.

Application Deadline:
March 22, 2023

ROCKY MOUNTAIN BIGHORN SHEEP NEW MEXICO

We offer hunts for these animals in all available units except in unit 45 (Pecos). You will be greeted by a team of people to help you with your hunt. Depending on the unit drawn it may be a horseback hunt or a backpack style hunt. Please feel free to contact us about the different hunts and we will attempt to pair you up with a hunt that will work for you. These hunts begin in August and run through January, depending on the unit drawn.

Draw information:
You can apply for both Rocky Mountain sheep and Desert

sheep on the same application. For each hunt code (Rocky Mountain and Desert) you get to select three hunt areas, which will have different dates corresponding to them. When your application is pulled, the Department will look at each hunt code and area in the order that you list them and they will review all of your choices at the same time.

DESERT BIGHORN SHEEP - MEXICO

Two types of sheep hunts are offered in Mexico. The first type of hunt is a "free range" hunt and the second is a "high fence" hunt. All of the hunts, regardless of type, are conducted on a 1x1 basis with the normal method of hunting being glassing, spotting, and stalking. High rack trucks are utilized to get around the different ranches. Depending on the condition of the hunter, sitting on watering areas with blinds are also utilized during the hunt. All licenses are guaranteed with no draw or applications.

The hunts are all 10 day hunting packages and include a 1x1 guide service, accommodations for the hunt, all meals, ground transportation to and from the Guaymas or Hermosillo airports to all hunting areas, hunting license/tag, gun permit, soft drinks, beer, and field care of the trophy. The price of the hunt does not include, air transportation to the Mexico airport, CITES permit, taxidermy and trophy export fees, imported liquor (you can bring your own) and gratuities to the guides and cook staff.

IBEX

New Mexico's Florida Mountain is the only place in the Western Hemisphere where pure blood, unfenced, free ranging Persian (aka Bezoar) Ibex are hunted. Our staff includes many of the former Kauffman Outfitters personnel. With more than 2,000 man-days of ibex hunting experience, our strategies consider hunter density, hunt type (rifle or bow), wind conditions, seasonal vegetation changes, precipitation, cougar sign, and our hunter's experience level. We can accommodate hunters from youth through old age and those with some physical limits. Note that the youth hunt occurs during the school Christmas break.

Safari Club International (SCI) keeps trophy statistics for the Ibex worldwide. Their record book shows that the worldwide highest scoring Bow or Muzzle Loader kills and the second highest scoring Rifle kill were in New Mexico. Within New Mexico we have guided 5 of the top 6 bow kills, 87% of the guided bow kills, 54% of all bow kills (guided or not) and 35% of all the Ibex entries (any weapon) in the book. Only nine percent of the entries are attributed to other outfitters that are still in business. That's why people hunt with Kiowa!

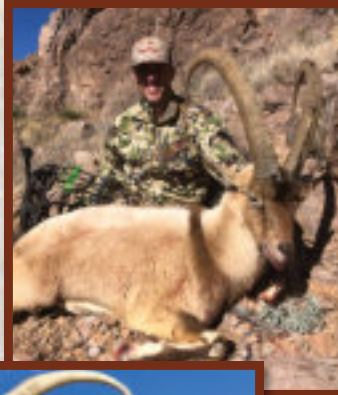

With Kiowa you could kill several Ibex with a bow before drawing a rifle tag. Despite rumors to the contrary, short bow shots are possible for billy Ibex.

Drawing details:

Applying with the Kiowa Outfitter number, which is available on the Kiowa website, improves your draw odds substantially.

Currently the Ibex population is at a low compared to past years. To address this situation the Department has decreased the number of licenses available, have changed the Muzzleloader hunt from a fifteen day hunt to a seven day hunt, and have banned scopes on muzzleloaders.

Drawing a bow Ibex license is much easier than a firearms Ibex license. For most bow hunters the January hunt is a better fit into their schedule than the October hunt. But, when compared to the non-resident January bow hunt, the outfitted January bow hunt odds are more

than twice as high and the outfitted October bow hunt odds are more than 6 times as high.

Cost of hunt includes: Use of our outfitter number on your application, snacks & drinks to carry, evening meal, include all portable meals on the mountain, evening meal, courtesy transportation during the hunt, the most experienced Ibex guides and spotters in New Mexico, assistance with retrieval of your animal, and capping for trophy preparation.

The hunter is responsible for:

Applying for the license with our help, lodging, the cost of the license, a daypack, hunting gear and transportation to and from the hunt near Deming, NM.

PUBLIC LAND BARBARY SHEEP (Aoudad)

This hunt is for free ranging Barbary Sheep (Aoudad) in New Mexico. It is an excellent hunt for excellent animals. This is a park the vehicle and hike style hunt and the vehicle is seldom seen again until dark. This is a physically challenging hunt with numerous miles of walking done each day.

New Mexico Game and Fish has made some changes for next year and this will make it easier for you to draw a tag. The number of tags are going up by 20% due to an increase in populations. The number of hunts will increase and the number of days hunting will be reduced to five day hunts instead of 14. We hunt in all three hunt units. A hunt unit is multiple units combined into one hunt unit. The hunt units are comprised of **1:** Unit 28 McGregor Range, **2:** Units 29 and 30, and **3:** Units 32, 34, 36, and 37. Each of these hunt units will have multiple hunt dates and you can mix or match hunt units on your application and all will be valid to be drawn.

Cost of the hunt includes: courtesy transportation during the hunt, drinks, snacks, and lunches during the hunt.

The hunter is responsible for: travel to the city that we choose to

operate out of for the hunt or other hunt areas, motel accommodations, meals, personal gear, and licenses.

Hunters should bring comfortable day packs to carry water, storm clothing, and other personal items.

Public land licenses are by draw. The odds of drawing this tag, utilizing an outfitter number is excellent.

We would like to welcome you to quality hunts with Kiowa Hunting Service. We have been in the hunting business for over 35 years and continue to expand to meet your hunting expectations. Kiowa Hunting Service is a full services organization. Whether you are looking for big game or exotics, we can help you collect that special mount for your wall.

"This institution is an equal opportunity provider."
Kiowa Hunting Service operates under various permits in/on:

- Carson National Forest
- Cibola National Forest
- Coronado National Forest
- Gila National Forest
- Lincoln National Forest
- Santa Fe National Forest
- Las Cruces District - BLM
- Socorro District - BLM
- Farmington District - BLM
- Pecos District - BLM
- Taos District - BLM
- New Mexico State Land Office
- White Sands Missile Range

We Proudly Accept
